

Royal Primary Care

Salaried GP

Royal Primary Care – Chesterfield

Royal Primary Care is the primary care arm of Chesterfield Royal Hospital. With a new leadership team in place and a rapidly improving CQC we are looking to recruit 6 WTE GPs. All levels of experience are welcome.

Royal Primary Care has 31000 patients registered to 2 principal areas – Chesterfield (comprising The Grange Medical Centre and Rectory Road and Inkersall at Staveley) and Clay Cross (comprising Blue Dykes Surgery in Clay Cross and Grassmoor).

Clinical teams are principally locality based to develop and maintain continuity although some cross site working is required. Each site comprises GPs, ANPs, a Practice Nursing team and Pharmacists with additional Physio and Mental Health Practitioners as well. Our breadth of primary care team aligns with our “Right Care, Right Clinician, Right Time” approach.

- Salary £93,000 - £110,000 p/a (pro rata for less than WTE).
- NHS Indemnity.
- EMISWeb and SystemOne – moving to a unified SystemOne deployment in Q3/4 2018.
- Rapidly improving practice – we have moved from three ‘inadequate’ domain ratings to being ‘good’ in safe and effective and ‘requires improvement’ for responsive. With the dedication and drive from our primary care team we continue to rapidly progress our improvement plan to ensure the three ‘requires improvement’ ratings will be ‘good’ in early 2019. *The CQC report commended RPCs turn-around strategy and rate of progress*.
- Opportunity to develop additional skills through spending time in secondary care. We are able to encourage and develop special interests that are applicable to primary care e.g ENT, ophthalmics, gynaecology, psychiatry, gerontology, paediatrics etc.

We welcome interested GPs to contact us and visit our sites and talk to our team.

In the first instance please contact the Divisional Director Dr Peter Scriven on p.scriven1@nhs.net
